

Multi TimeFrame Analysis

1. Always Start with daily timeframe
 2. Mark Structure in daily and its structure levels
 3. Then shift to 4hr and mark its levels
 4. Major Trend is determined by 4hr & Daily levels only
- Bias is not decided below 1hr timeframe it will be considered as Scapling
Trading in smaller timeframe is scapling not directional trading

1st Condition

1st Condition of MultitimeFrame

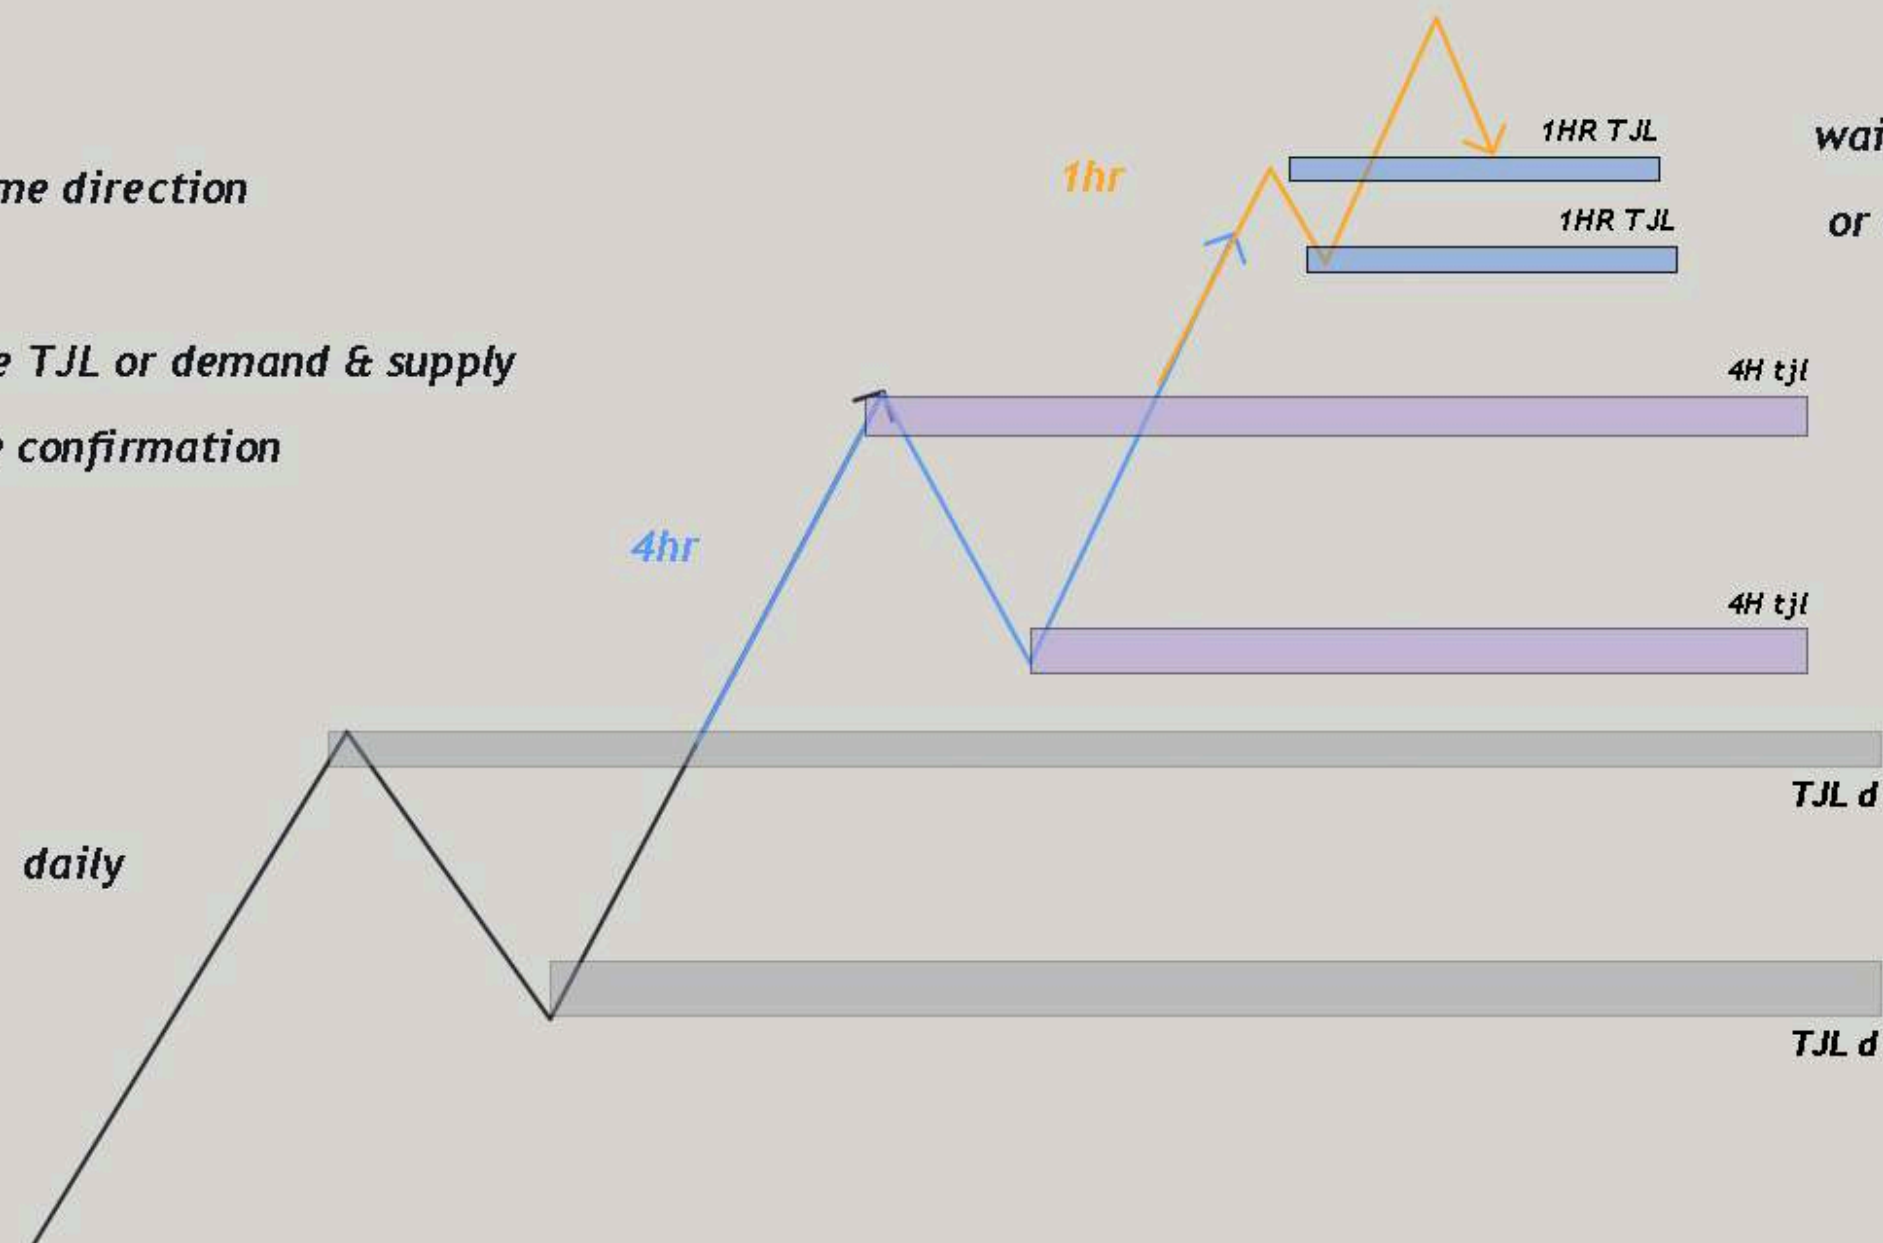

When all timeframe are aligned in same direction
i.e - 1hr - 4hr - daily

in this condition
when price tap 1hr structure levels i.e TJL or demand & supply

take direction entry on 1-5min candle confirmation
or 1min choc level

wait for 1min choc

or direct 1-5 min candle confirmation entry

2nd Condition

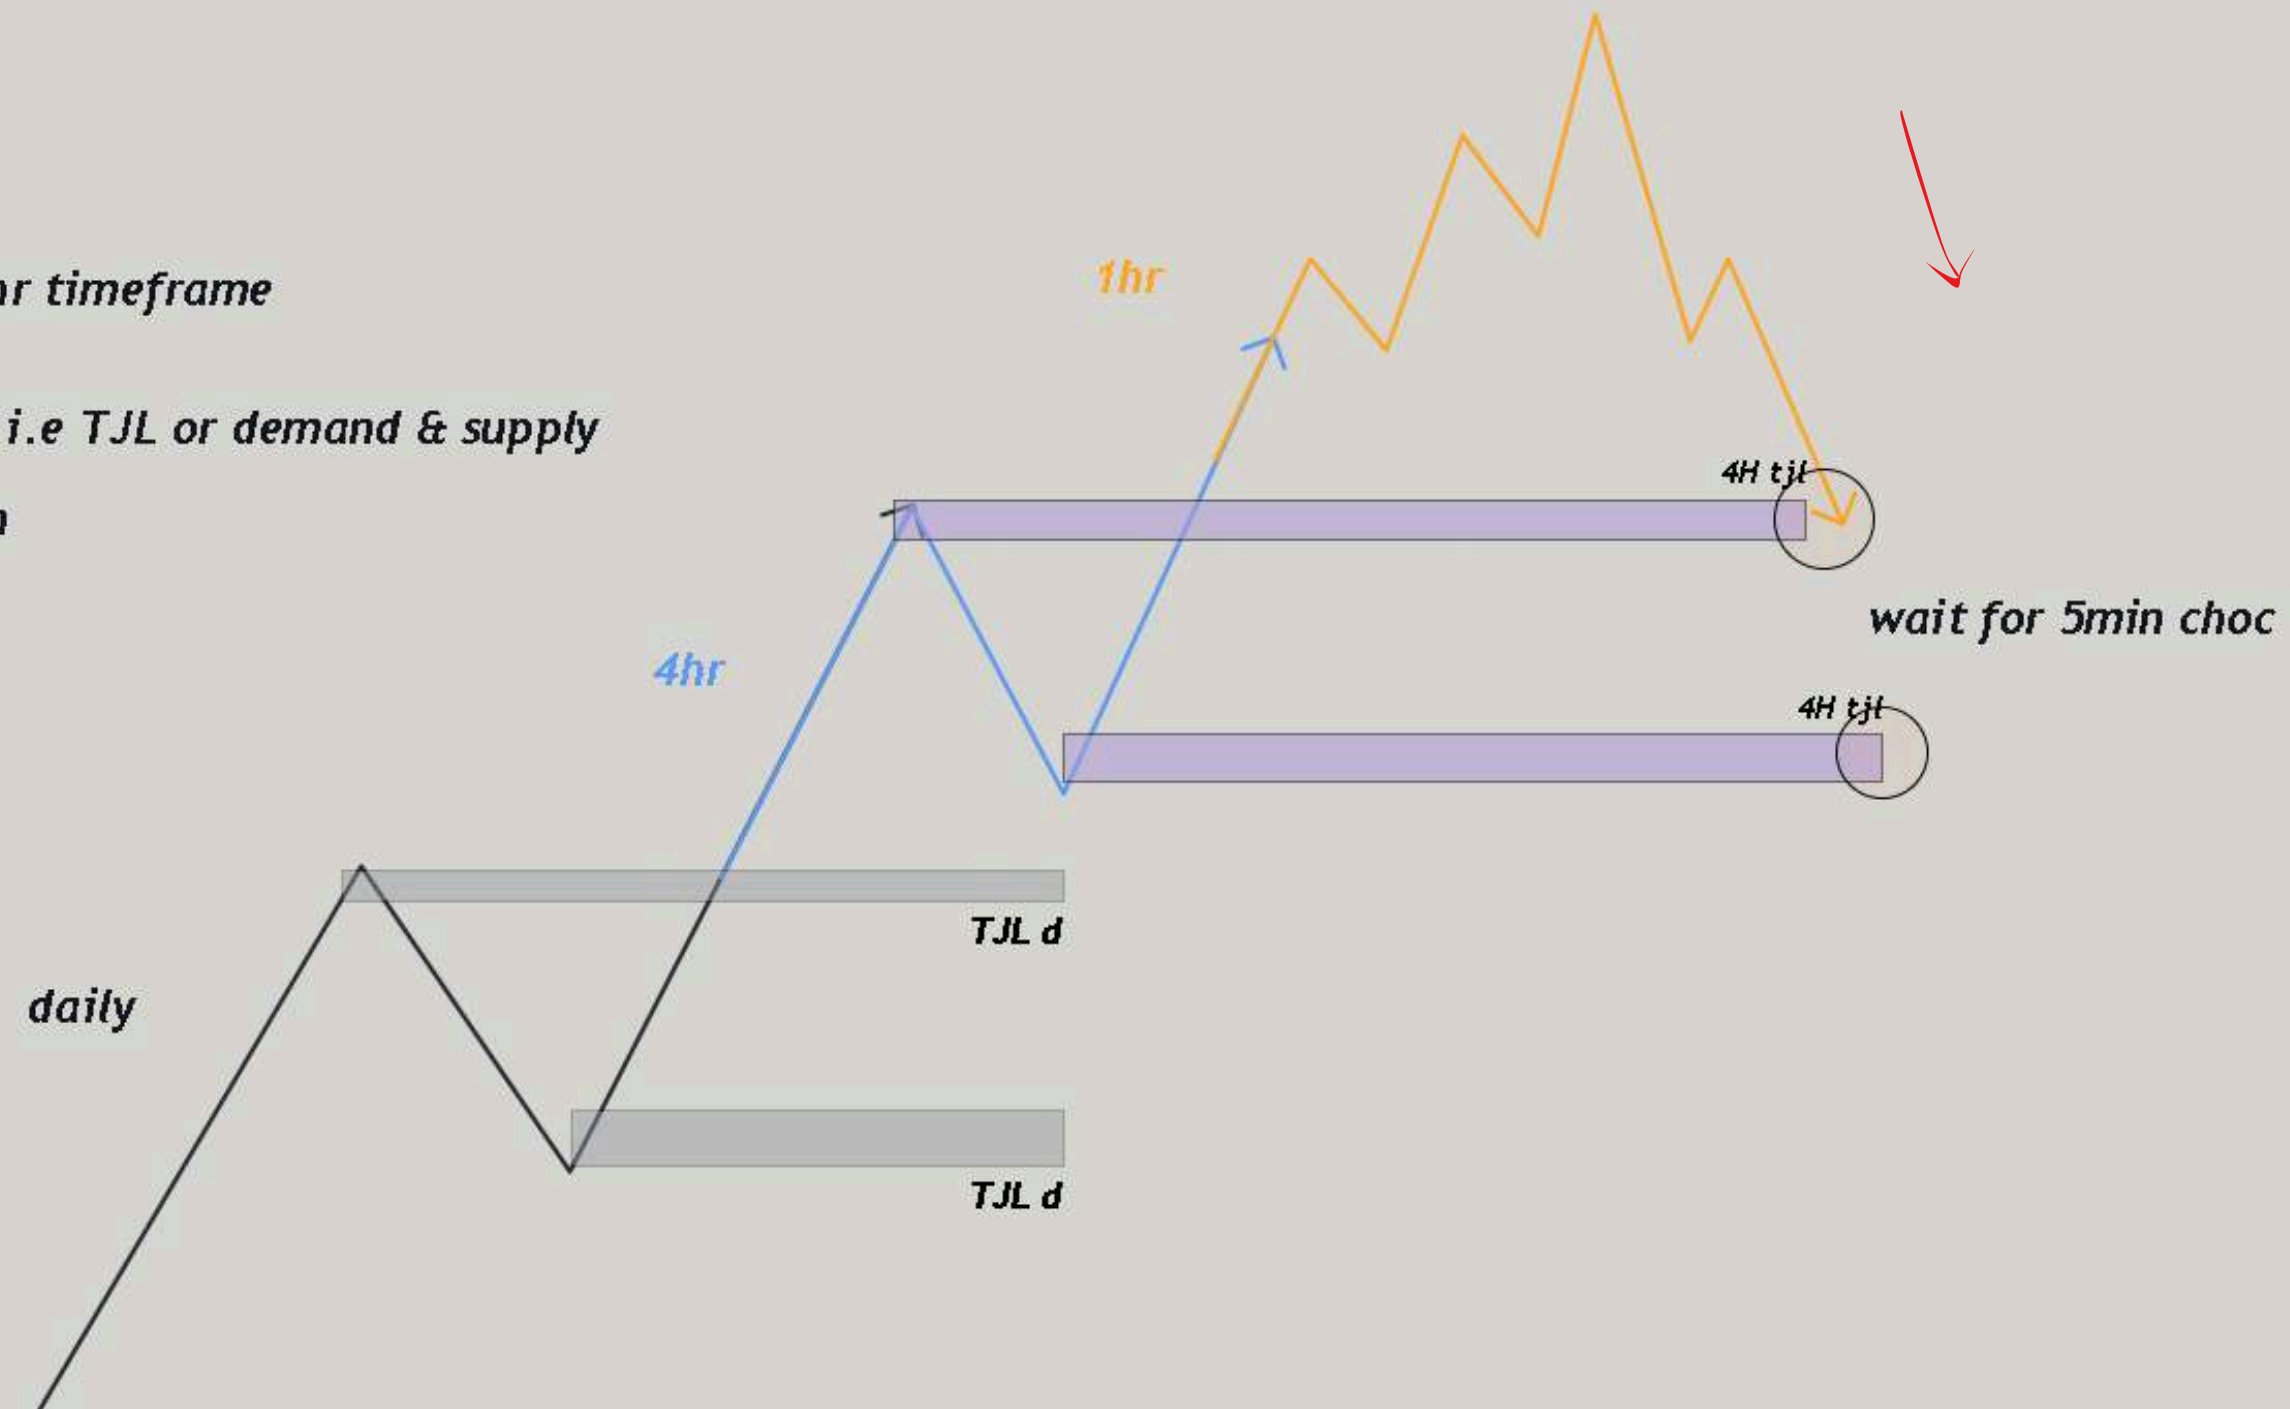

2nd Condition of MultitimeFrame

When 1hr is opposite to daily and 4hr timeframe

in this condition

when price tap 4Hr structure levels i.e TJL or demand & supply

Wait for 5 min choc for confirmation

3rd Condition

3rd Condition of MultitimeFrame

When 1Hr & 4Hr is opposite to Daily timeframe

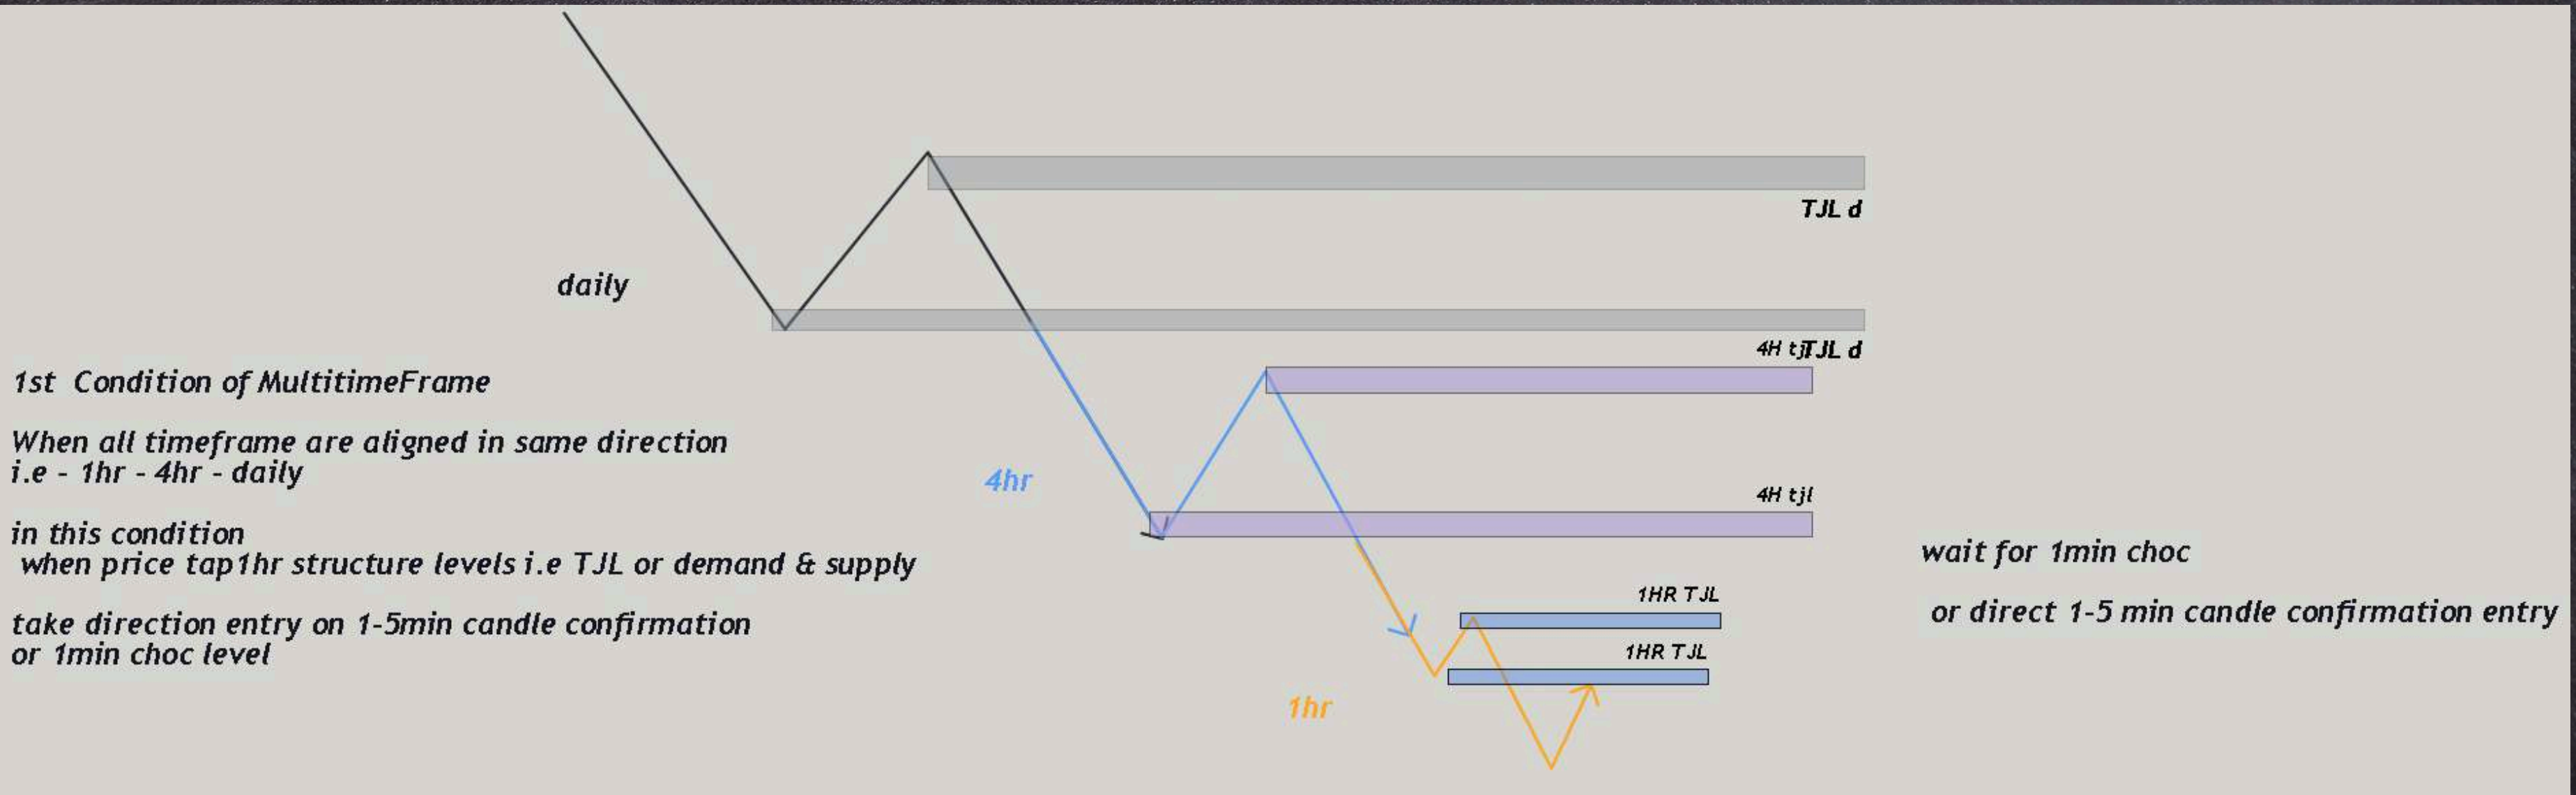

in this condition

when price tap Daily structure levels i.e TJL or demand & supply

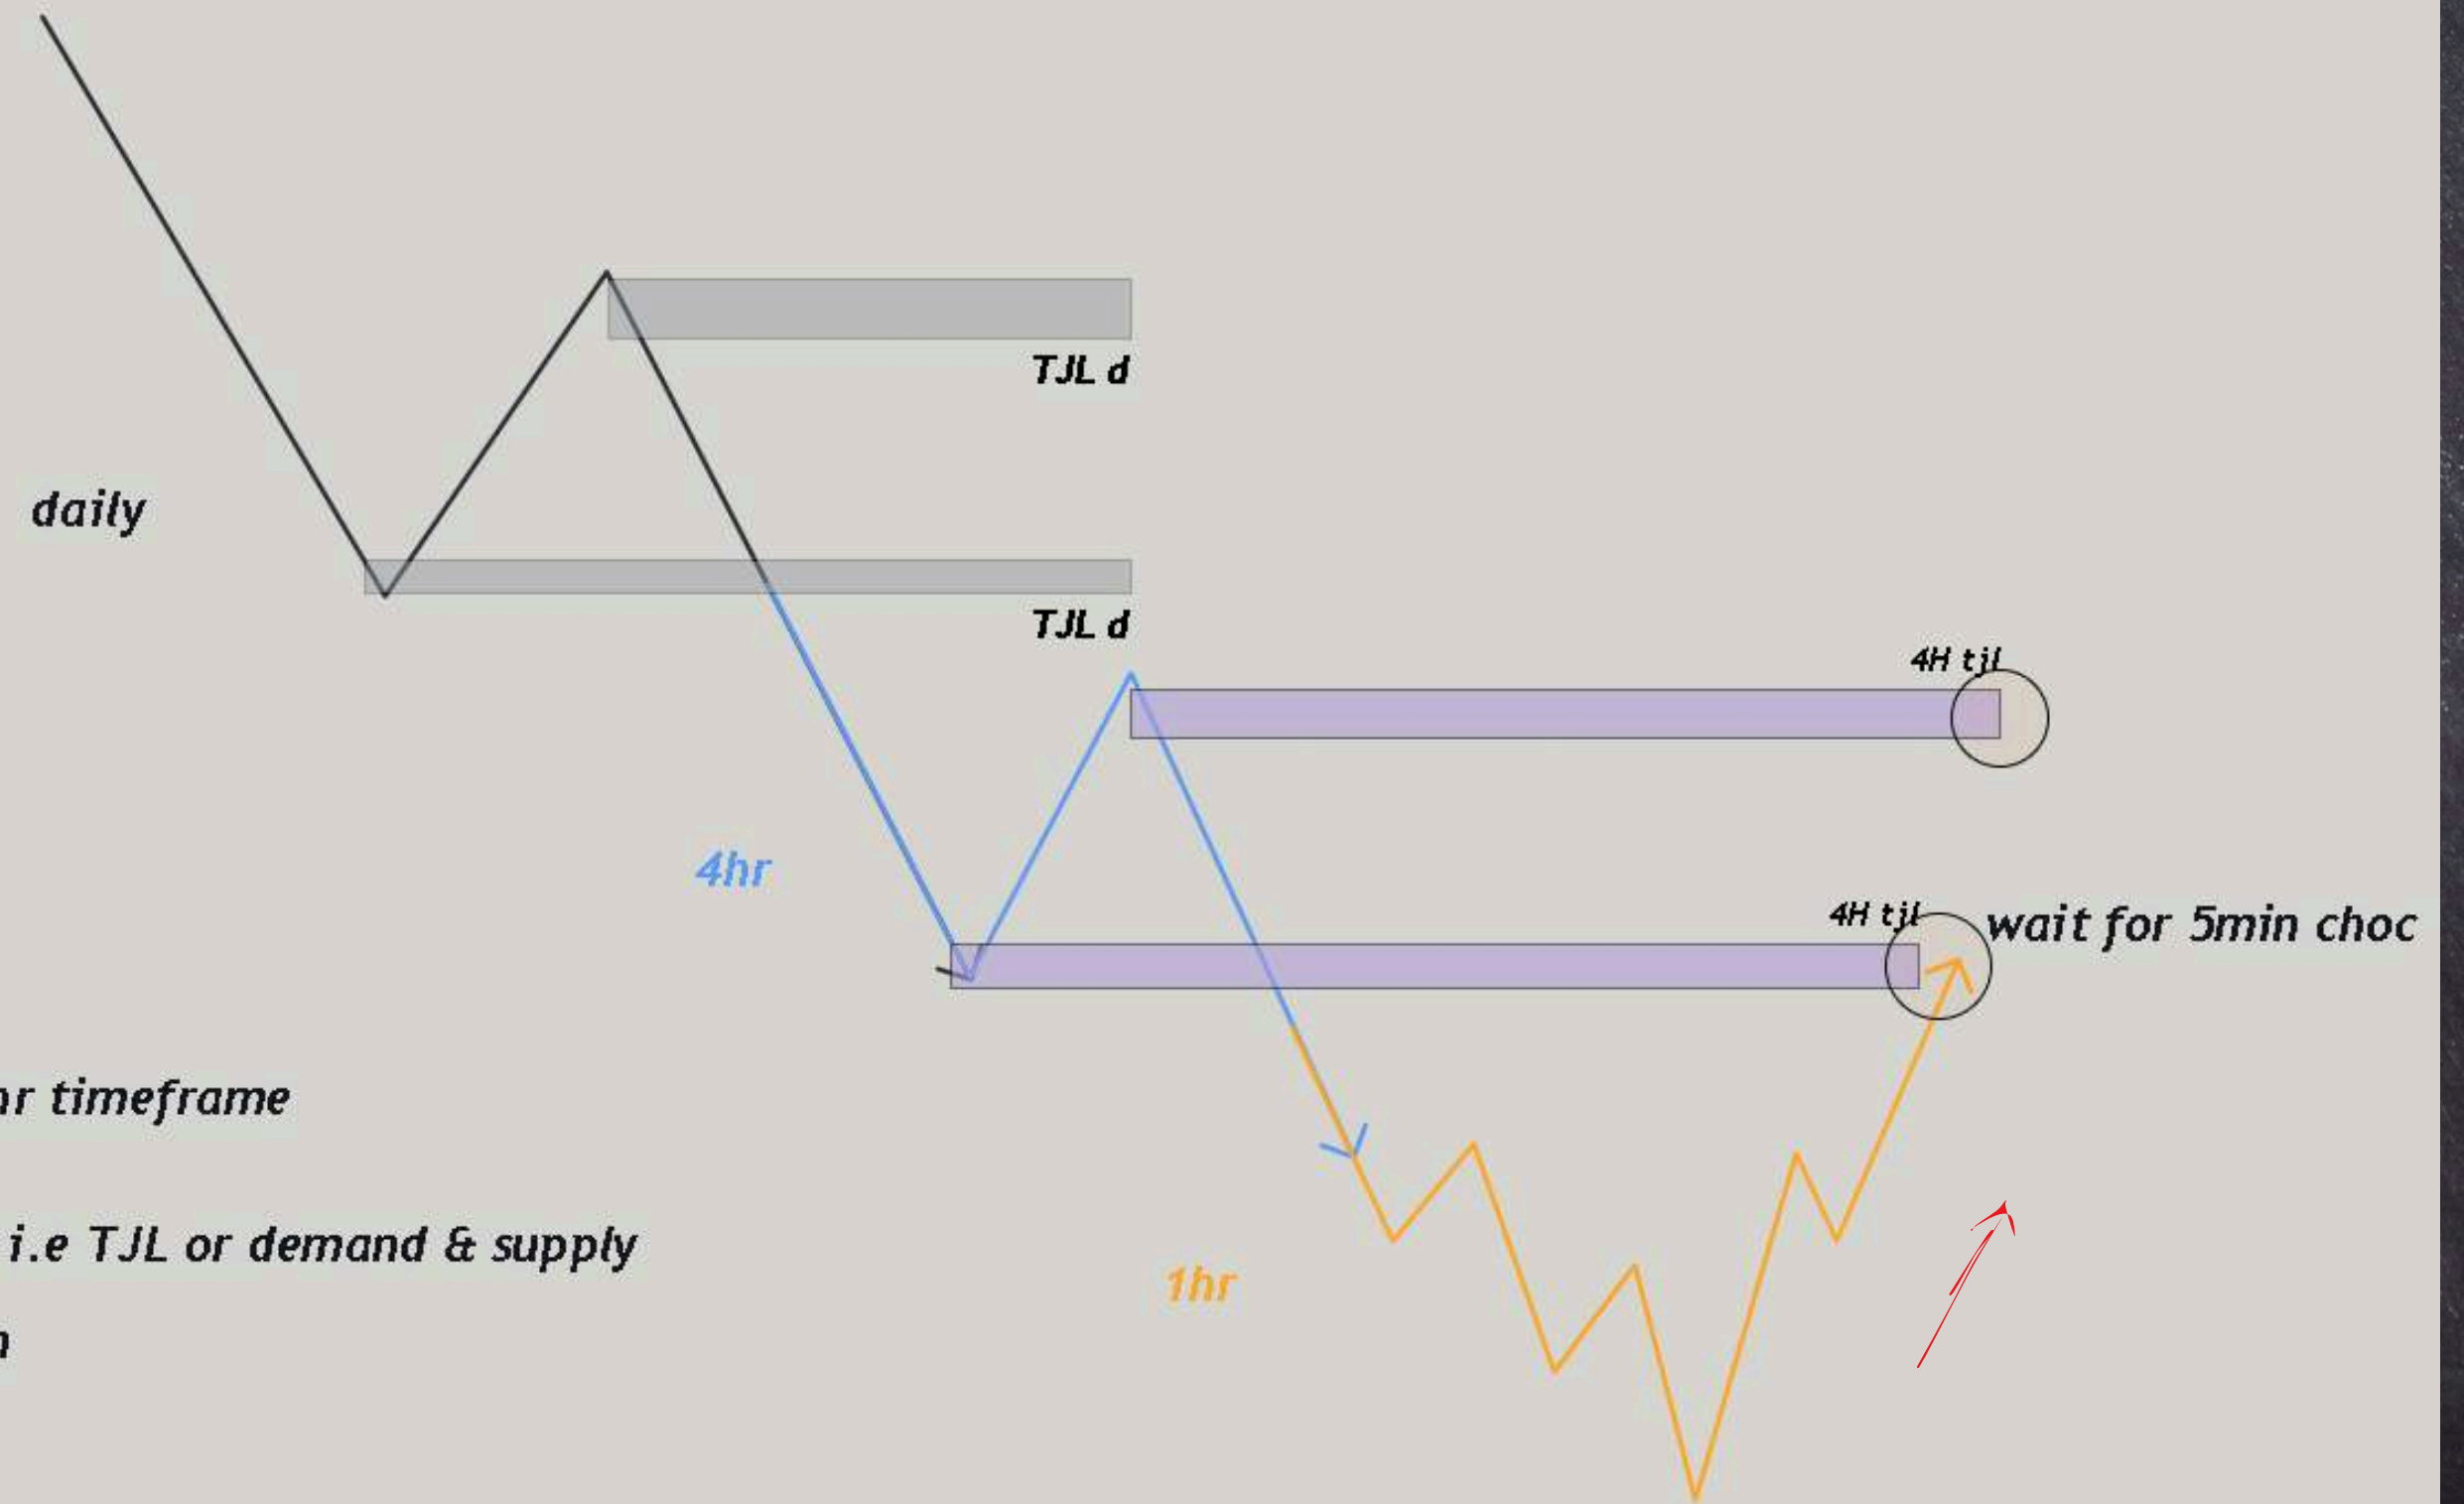

Wait for 1Hr choc for confirmation

1st Condition

2nd Condition

2nd Condition of MultitimeFrame

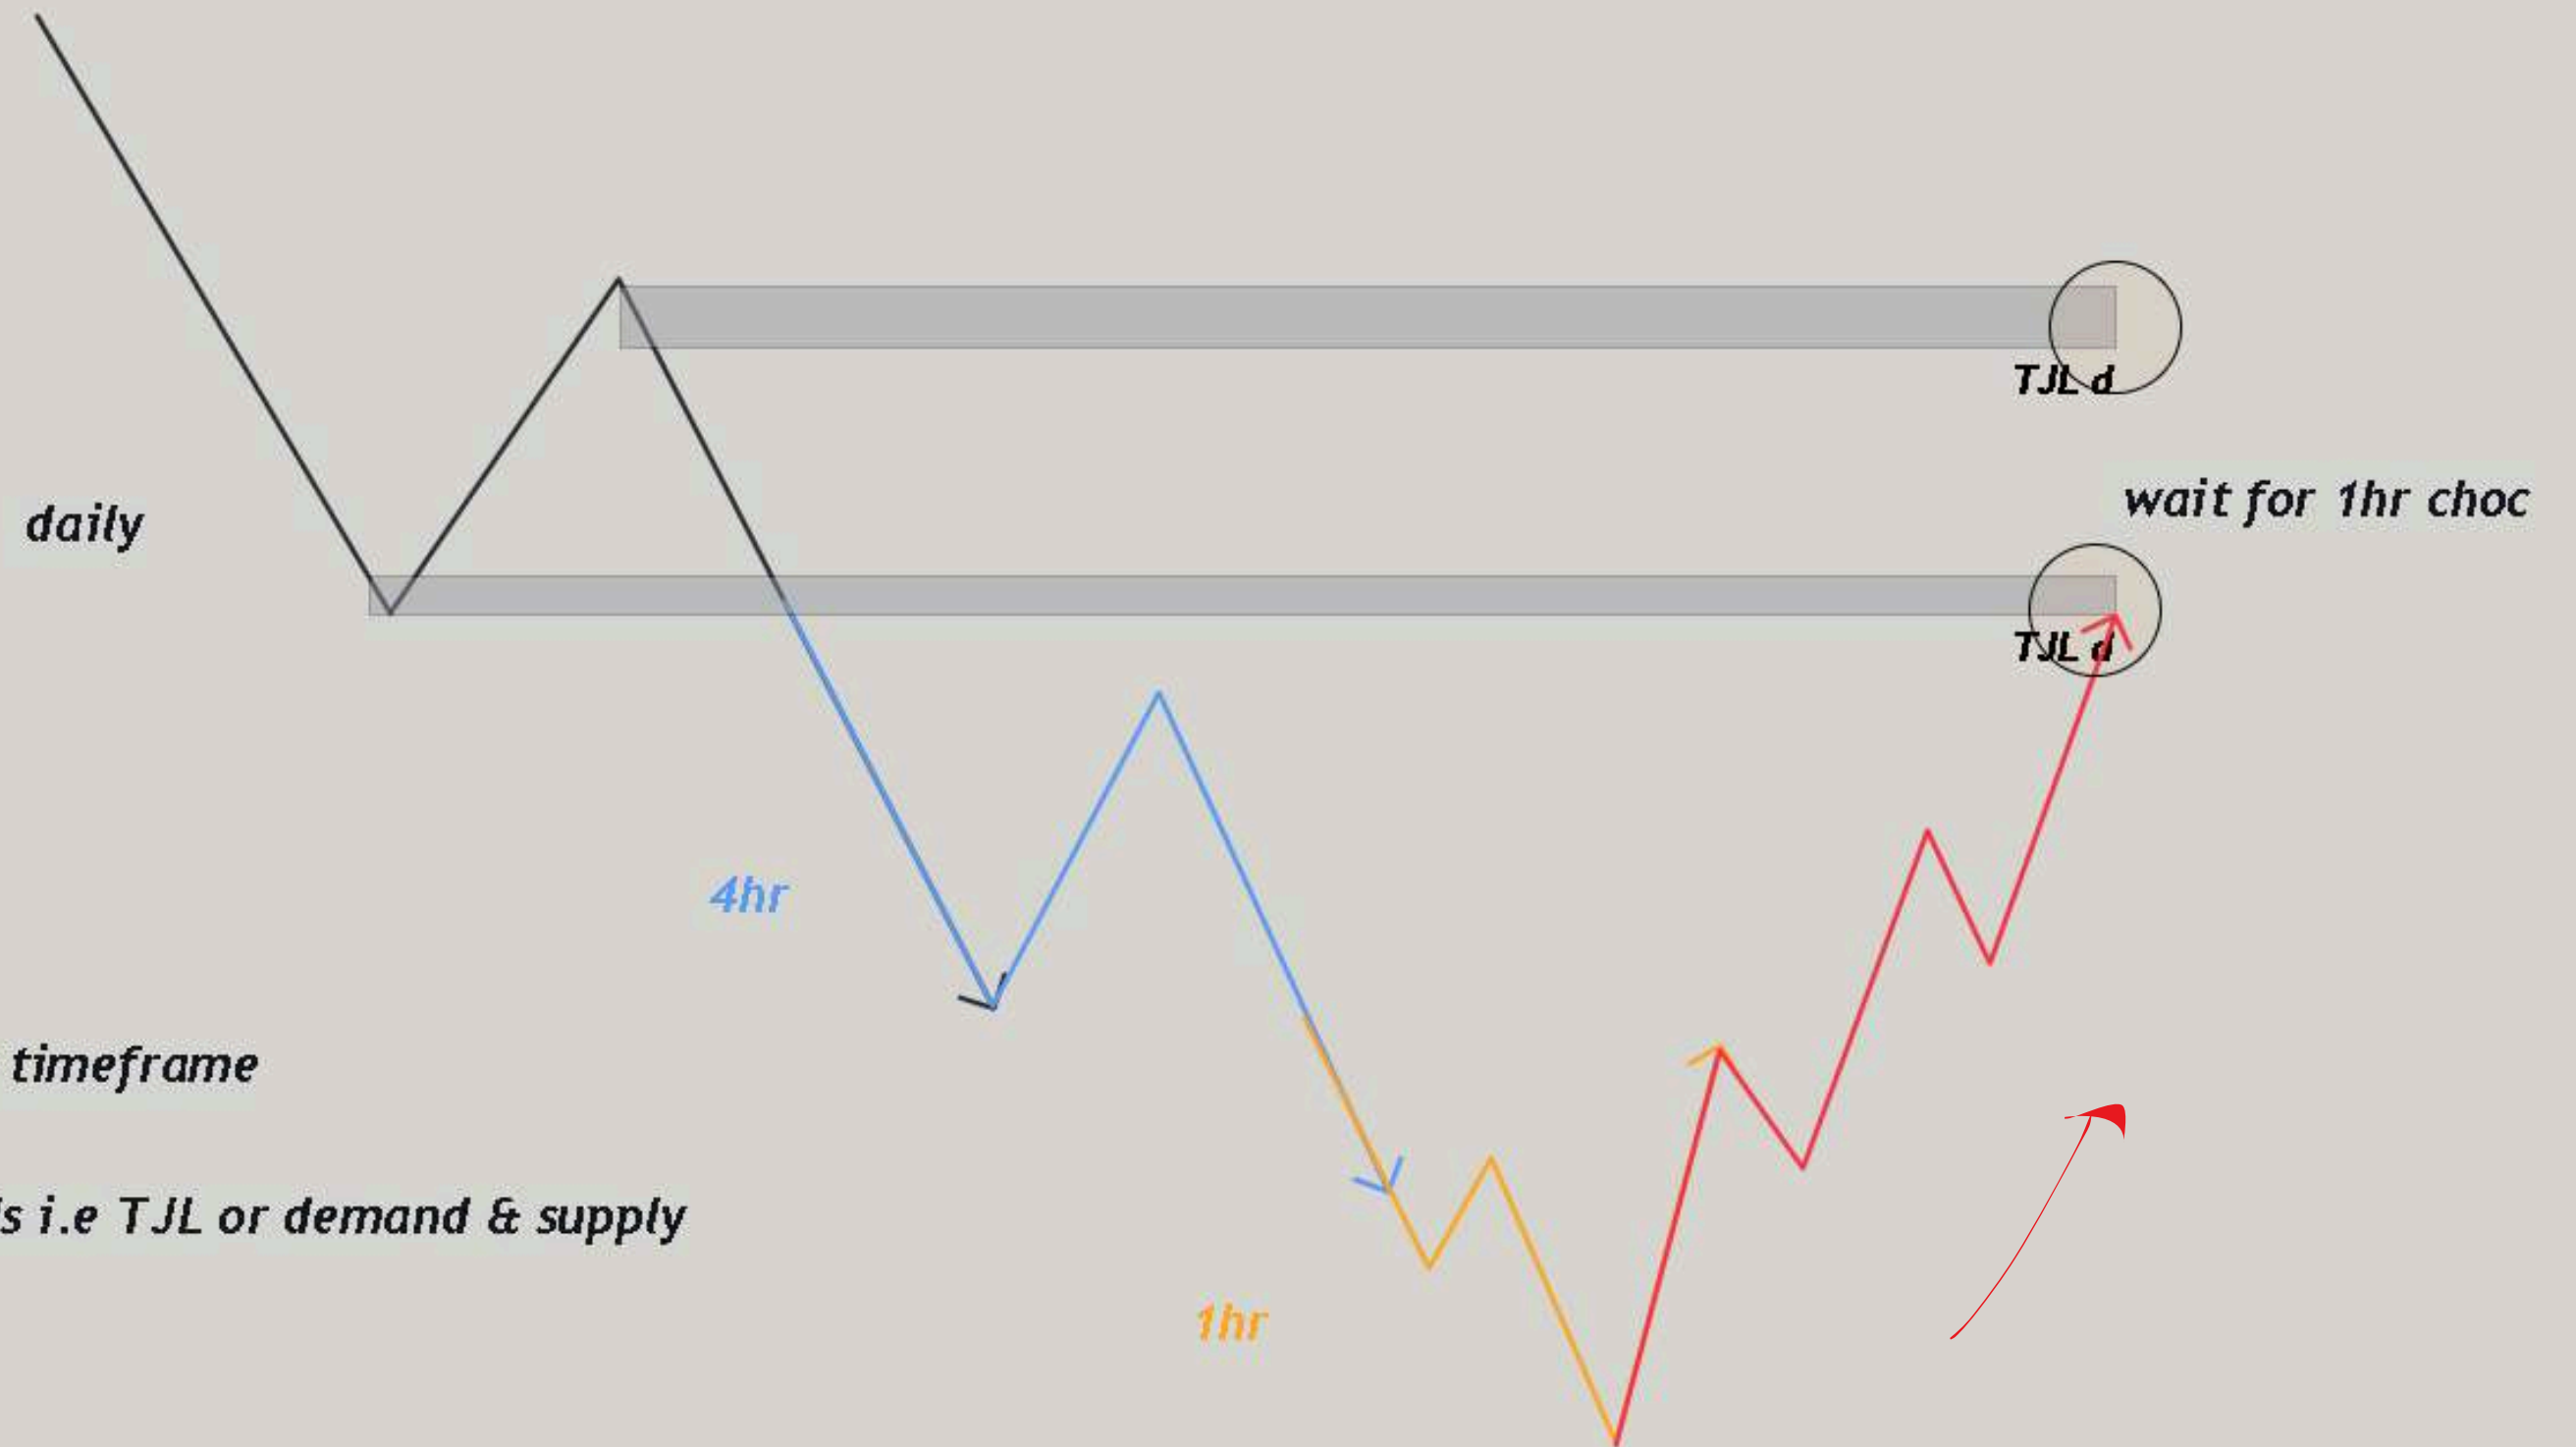

When 1hr is opposite to daily and 4hr timeframe

in this condition

when price tap 4Hr structure levels i.e TJL or demand & supply
